

Take into account games played on boards smaller than 19x19 in the European Rating System

Allow players below 20 kyu to have games played on boards below 19x19 size taken into account in the ratings.

This would allow the organization of “beginners friendly competitions” - just to give beginners or children the possibility to play on smaller sizes and see their rating oscillate/evolve upward.

In details:

- Games on 13x13 and 9x9 would be taken into account only if both players are below 20 kyu.
- There could be a different weight according to the size. Suggestion is that 19x19 would have a weight of "1", 13x13 "2/3" and 9x9 "1/3". So 3 wins on a 9x9 would be equivalent to 1 win on 19x19...
